8. Please matter	...P.5
9. Revision Record	...P.5

## Appendix

**Form-1 : Consent form of Dainichi Electronic Green Procurement Standards**

...P.6

## 1. Objectives

The Dainichi Electronic Corp. promotes green procurement through strong partnerships with its suppliers, striving to supply customers with environmentally conscious products, lower environmental impact and contribute to realizing a recycling-based society.

## 2. Scope of application

- (1) This green procurement standard document is utilized in the procurement activities of all materials delivered to the Dainichi Electronic Corp..
- (2) Materials: Includes production materials used in Dainichi Electronic Corp. products (raw materials, processed materials, parts, units, OEM, packaging materials), as well as indirect materials used in Dainichi Electronic Corp. production processes (gas, chemicals and equipment, materials possible to install in or attach to products). While other transactions (software, labor contracts, etc.) are generally excluded from Green Procurement surveys, when the need arises there may be cases when requests will be issued for such surveys by specific Dainichi Electronic Corp. places of business. (Excluded: Solder, flux and solvent)

## 3. Supplier Selection Evaluation Standards

We will prioritize purchasing from business partners who are in good condition of the implementation status of environmental load reduction activities and management status of chemical substances contained in products and will comply with this green procurement standard document.

## 4. Requests for Understanding of Environmental Hazard Substances and Cooperation in Content Surveys

Dainichi Electronic Corp. Purchasing Department will investigate on this green procurement standard document. Please understand the contents of this green procurement standard document and, please submit a consent form to us.

Documents to be submitted : Consent form of Green Procurement Standards (form-1)

In addition, we will investigate information on chemical substances contained in products according to the following form as necessary, so please disclose / transmit.

< Disclosure of information on chemical substances contained in products, format upon submission >

- 1) The following form Joint Article Management Promotion-consortium(JAMP <http://www.jamp-info.com/>) recommends.
  - chemSHERPA-AI/CI
  - MSDSplus \*1(from July, 2018)
  - AIS \*1(from July, 2018)
  - JGPSSI investigation answer tool \*1

chemSHERPA: The information communication format of chemicals JAMP offers.

<https://chemsherpa.net/chemSHERPA/>

chemSHERPA - AI handles chemicals contained in a molded article and chemicals

chemSHERPA - CI contains in chemicals.

MSDSplus and AIS are the information communication format of chemicals JAMP offers.

MSDSplus complements MSDS and AIS handles chemicals contained in a molded article.

JGPSSI: Japan Green Procurement Survey Standardization Initiative is already canceled already with a start of IEC62474.
